2020 ROLEX SYDNEY HOBART YACHT RACE

NOTICE OF RACE

SYDNEY, AUSTRALIA // 26 DEC 2020
Dear Fellow Sailors,

On behalf of the Cruising Yacht Club of Australia, it is my pleasure to invite owners and charterers of eligible boats to participate in the 76th Rolex Sydney Hobart Yacht Race starting at 1pm on 26 December 2020.

Following on from the success of the 75th race, which had a record live audience to see the 157 yachts start and reached more people around the world than ever before, this too is a special year.

In 1946, Jane Tate and Dagmar O’Brien respectively joined the Active and Connella crews and these women paved the way for the hundreds of female sailors who have since competed. So, in 2020 we are proud to celebrate the 75th anniversary of women entering the Great Race.

We are also excited to see the introduction of Two-Handed crews as part of the Rolex Sydney Hobart Yacht Race. This is an important evolution for both the race and the CYCA as we look to remain at the forefront of blue water sailing. Entry and team criteria will be outlined in this Notice of Race.

Both the Sydney and Hobart Race Villages provide an exciting meeting place for skippers, crew, families and friends with entertainment, race merchandise, local food, wine tastings and children’s activities.

Please diarise the following key dates with further updates provided through regular Skippers newsletters, our website and via social media.

Appendix B - Stability Requirements (relevant parts copied from AS Special Regulations)

General

The requirements specified in this appendix apply to all boats intending to enter regardless of the handicap system in which they intend to enter.

Competitors found to be falsifying documentation, deliberately invalidation certificates or otherwise misleading the Race Committee with regard to stability of their boat are subject to action under RRS 69.1. If found guilty the penalty could include disqualification from the Rolex Sydney Hobart Yacht Race. The incident would also be reported to Australian Sailing.

A determination by the Organising Authority or the Race Committee as to the suitability of supplied documentation in demonstrating a boat’s compliance with the stability requirements, as to whether there is a satisfactory margin as required by this appendix or as to a boat’s compliance with the stability requirements is final and binding.

All boats - resistance to capsize

A boat shall provide evidence as follows to demonstrate that it achieves not less than:

- an ORCi Stability Index of 115 for the configuration in which the boat proposes to race; or
- International Standard ISO 12217 – 2 Design Category A except that the STIX Number shall be increased to a minimum of 35 (The OA may elect to obtain technical advice as to a boats eligibility and the data and documentation supplied, at the cost of the entrant concerned. This may include having measurements redone and documentation reproduced by another Naval Architect).

Boat holding, valid ORCi Certificate

A boat with a current, valid ORCi Certificate shall supply that certificate, including the Stability and Hydrostatics Datasheet.

Boat previously holding valid ORCi Certificate

A boat without a current, valid ORCi Certificate but with a previously valid (but not current) such certificate shall supply its most recent previously valid (but not current) certificate, including the Stability and Hydrostatic Datasheet, with a stability index with a satisfactory margin to the Minimum Stability Index for Race Category 1 events for the configuration in which the boat proposes to race, accompanied by a completed
Stability Declaration supplied by the Organising Authority. Special Regulations Appendix B 3.3 shall apply.

**Boat achieving ISO 12217-2 Design Category A**

A boat with a current, valid certificate demonstrating that it achieves International Standard ISO 12217-2 Design Category A with a STIX value increased to a minimum of 35 shall supply that certificate.

In the calculation of stability data:

- The hydrostatics and stability demonstrating the yacht’s compliance with ISO Category A shall be derived from measurement of the freeboards and righting moment of the actual yacht by a qualified source (ie an inclination test)
- Deck and other enclosed volume above the sheerline may be taken into account, in which case offsetting cockpit volume shall also be taken into account.
- Mass shall be taken as Minimum Operating Mass as defined by ISO 12217-2, paragraph 3.5.3.
- A GZ curve shall be submitted as part of the ISO statement.

In the assessment of ISO category for yachts fitted with moveable and/or variable ballast, ISO 12217-2, paragraph 6.1.4 b) shall not apply. Boats shall comply with paragraphs 6.2.3, 6.3.1 and 6.4. Calculations shall be for the ballast condition that results in the most adverse result when considering each individual stability requirement. ISO 12217-2 Annex C, paragraph C.3.3, first sentence, the word ‘may’ is replaced with ‘shall’. ISO 12217-2 Annex C, paragraph C.3.4 shall not be used in the calculation of righting lever.

**Boats with movable or variable ballast**

**Boat achieving stability by ISO 12217-2 Design Category A**

A boat with movable or variable ballast shall provide evidence that it achieves not less than a Knockdown Recovery Factor of 0.9 under International Standard ISO 12217-2, calculated in accordance with ISO 12217-2 paragraph 6.4.4 with the lesser of FKR90 and FKR-90 used. Special Regulations Appendix B 7.2.3 shall apply.

**Boat achieving stability by ORCi Certificate**

A boat with movable or variable ballast shall provide evidence that it achieves not less than a Ballast Leeward Recovery Index of 0.9. Special Regulations Appendix B 7.1.1 shall apply.

**All boats**

Other than in the case of a boat that submits a current, valid ORCi Certificate, the Organising Authority may elect to obtain technical advice as to a boat’s eligibility and the data and documentation supplied, at the cost of the entrant concerned. The entrant will be consulted prior to this occurring.
